BRIEF OUTLINE OF PLOT:

(Information in brackets NOT FOR PUBLICATION)

Global Chemicals has set up a Research Centre at Llanfairfach, near the coast of South Wales. While it has a genuine project on hand, the field trials of a new method of 'cracking' crude oil, it also houses the giant computer which deals with the entire world-wide operations of the company. The trials have proved an enormous success, much to the delight of the badly unemployed villagers, thrown out of work by the closure of the valley coal mine. The Government has given permission - and what's more, money - for the setting up of a full scale refinery.

The plans of G.C. are not without opposition. Clifford Jones, the wild-eyed, wild haired boffin of about thirty, famous for winning the Nobel prize for his work on DNA synthesis and notorious for his prophecies of ecological doom, has set up a community of cranks in Llanfairfach Valley. This is dedicated to demonstrating that the same way of life essential for planetary survival, is not only possible but vastly superior in quality to the usual twentieth century grunch yek and cetch.

The members of Jones's community, officially called 'Wholeweal', but probably known as the Muthutch, are the natural enemies of Global Chemicals and all its works. Having campaigned for two years against G.C.'s despoliation and pollution of the world environment, they are doubly incensed (being only human) that their own small paradise is now threatened.

A mysterious death in an abandoned coal mine, followed by other strange and dramatic events, suggests that Clifford Jones' worries are not without foundation. Unit begins to investigate, with help from the Doctor. (He discovers that waste from the oil refinery pumped into the abandoned mine has brought to life a swarm of giant green maggots, whose very touch is fatal. Moreover, the strange and hostile behaviour of Global Chemicals stems from the fact that the firm's giant computer has developed a will of its own and has taken over the minds of those working for the company.)

The Doctor battles against time to defeat the power-mad computer and remove this new menace to the ecology of Earth.)

CUT TO:

TELECINE 47A: Dur:

S.O.F.

Ext. Slag Heap. Area. Day.

CLIFF hurries up to BENTON.

essor.
BENTON: Hi Prof./ Come to visit
our little maggotfriends?

CLIFF: No, I'm looking for Jo Grant.

BENTON: You've just missed her.

CLIFF: She's in there?

BENTON: Certainly not. I wouldn't
let her through.

CLIFF: Thank God for that.

BENTON: She's gone to find the
Doctor, I think.

NO PAGE 2/

CLIFF turns and goes.

BENTON suddenly notices
a COUPLE OF SOLDIER, some
way away also about to
move into the forbidden
area.

BENTON: Hey! You! Don't you ever
listen to orders? What's the good
of me telling the tale if ... etc. etc.

He moves over to them,
still nattering.

CLIFF having turned to
listen to this, is about
to continue on his way,
when his attention is
caught by a movement.

P.O.V. SHOT.

JO is momentarily seen.
She vanishes behind an
outcrop.

CLIFF is about to call the
SERGEANT, but changes his
mind and runs into the
maggot zone.
